Office Action Summary

Application No.

09/606,683

Applicant(s)

SPALINK ET AL.

Examiner

Hussein A El-chanti

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 December 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3,7,8,13,15,17-21 and 23-27 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3,7,8,11,15,19,20 and 23-26 is/are rejected.
- 7) ☒ Claim(s) 17,18,21 and 27 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

1. This action is responsive to amendment received on Dec. 10, 2004. Claims 4-6, 9-10, 12-14, 16 and 22 were canceled. Claims 23-27 were newly added. Claims 1, 17, 18 and 21 were amended. Claims 1-3, 7-8, 13, 15, 17-21 and 23-27 are pending examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 7-8, 11, 15, 19-20, 23-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Khan, U.S. Patent No. 6,546,393.

Khan teaches the invention explicitly as claimed including a system and method for classifying and ranking a list of web pages using a plurality of users on a network (see abstract).

As to claims 1, 8, 23 and 24, Khan teaches a method and system respectively for classifying information available on a computer network, the method including:

receiving a list of network resource locators, said list being created by identifying network resources accessed by users of the network (see col. 16 lines 1-25, a list of bookmarks are downloaded to the client device to be categorized by the user) ;

for each network resource locator of the created list, sending the network resource locator to a graphical user interface (GUI) component of at least one Web-coding workstation connected to the network which is separate from the users of the network (see col. 11 lines 40-col. 12 lines 5, user selects a category for the website using a GUI);

receiving a selection from the at least one Web-coding workstation, with each selection representing a classification for the resource identified by the sent network resource locator, said selection being generated in response to a user using tools of said GUI component (see col. 11 lines 40-col. 12 lines 5); and

storing the classification in a separate database in relation to said resource locator and to said at least one Web-coding workstation (see col. 12 lines 1-27, the classification of the website is stored).

As to claim 2, Khan teaches the method of claim 1, wherein the list of network resource locators includes one or more Web sites accessed by users of the network (see col. 11 lines 45-col. 12 lines 27).

As to claims 3 and 11, Khan teaches the method and system of claims 1 and 8 respectively, wherein said tools include a hierarchical taxonomy of classifications and said selection represents one of said classifications (see col. 11 lines 45-col. 12 lines 27).

As to claim 7, Khan teaches the method of claim 1, wherein the database is one or more from a group consisting of:

a flat file; a binary tree; a relational database; and an object-oriented database (see col. 11 lines 45-col. 12 lines 27).

As to claim 15, Khan teaches the method of claim 1, wherein the network resource locator is sent to more than one Web-coding workstation, and wherein said classification is assigned based on receiving more than one source selection from said more than one Web-coding workstation (see col. 11 lines 45-col. 12 lines 27).

As to claim 19, Khan teaches the system of claim 11, wherein said at least one graphical user interface (GUI) comprises at least one GUI, and said data store is connected for storing the classification therein based on more than one same classification received for each resource identified (see col. 12 lines 15-27, users submit the classification vote, however the final classification is determined by the editorial staff, i.e. multiple level voting”).

As to claim 20, Khan teaches the system of claim 8, wherein the classification processor uses a multiple-level voting system (see col. 12 lines 15-27, users submit the classification vote, however the final classification is determined by the editorial staff, i.e. multiple level voting”).

As to claim 25, Khan teaches the method of claim 1, wherein said at least one Web-coding workstation comprises more than one Web-coding workstations, and wherein said classification is assigned based on receiving more than one source selection from said more than one Webcoding workstations (see col. 11 lines 45-col. 12 lines 27).

As to claim 26, Khan teaches the system of claim 8, wherein said at least one Web-coding workstation comprises more than one Web-coding workstations, and each one of said more than one Web-coding workstations having said graphical user interface (GUI) component having tools to allow more than one user, each corresponding respectively to one of said more than one Web-coding workstations to select a classification for each resource respectively identified by the resource locator of said lists (see col. 11 lines 45-col. 12 lines 27).

Allowable Subject Matter

3. Claims 17, 18, 21 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Pursuant to 37 C.F.R. 1.109 and M.P.E.P. 1302.14, the following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach neither singly or in combination the claimed limitation of "the network resource locator is sent to said more than one Web-coding workstation, which comprises a plurality of Webcoding workstations with each one of the plurality of Web--coding workstations being assigned a predetermined level from lowest to highest, and wherein said classification is assigned based on receiving a first predetermined number of same selections from Web-coding workstations at the lowest level, and if the first predetermined number of same selections is not received at the lowest level, basing the classification on receiving a second predetermined number of same selections from Web-coding workstations at the next highest level, and if not

received at the next highest level, repeating the process upward by level until a level specific predetermined number of selections are received from one of the levels” as in claims 17, 18, 21 and 27.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

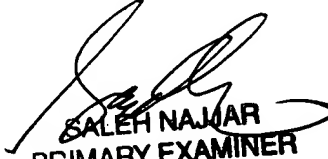

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hussein A El-chanti whose telephone number is (571)272-3999. The examiner can normally be reached on Mon-Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571)272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
